The Shops at Montebello PROJECT UPDATE

Boca Raton/Deerfield Beach, FL (May 16, 2017) - Boca Flasher, Inc., an innovator and industry leader in LED solutions since 1995, provided the finishing touch to the massive Shops at Montebello project with its HPNLS HO and LO (LED products) for the refurbished Patio Café, a 20-month reconstruction job completed in December 2016.

Selected to help create the client's vision of a more modern, state-of-the-art look, Boca Flasher exceeded expectations with a unique down-lighting feature that adds a crisp, quality, white-light ambience and illuminates the dining areas to greatly enhance the nighttime visual effect.

"I am very happy with how the lighting turned out," says Brandon Wernli, Director, Production, KTGy. "The client is very happy with the transformation."

Prior to Boca Flasher's involvement, it became apparent late in the project that a challenge existed to find an LED product with the proper optical control to up-light the panels positioned above the entry while, at the same time, providing wall grazing and washing to add visual interest to the walls (instead of painting the wall or hanging objects on it).

An indoor, super-regional shopping mall located in Montebello, CA (east of downtown Los Angeles), The Shops at Montebello offer more than 160 national and local retail outlets including Aeropostale, Disney Store, Gymboree, Hollister, Victoria's Secret and BJ's Restaurant & Brewery.
